

Cuanto Consulting

Introduction and Summary of Services

COMPLEX CALCULATIONS CRAFTED CLEARLY

Cuanto Consulting is challenging the stereotype of dull, predictable, and formulaic actuarial analysis. Let me show you that clarity and business acumen need not be sacrificed for solutions to intricate problems. I don't overwhelm my clients with convoluted jargon. I believe that to understand something deeply, requires the ability to explain it simply. I work hard for clients, but I also work alongside clients, utilizing their skills to tailor work to specific needs, and collaborating as a partner, colleague, and friend. I'll bring clarity and fun to your most demanding analytical problems.

Cody Webb, FCAS, CPCU, MAAA
Principal

Research Reports

- Marketing reports and case studies
- Legislative or litigation analysis
- Technical documents

Analytical Tool Development

- Spreadsheets and codes
- Integrated with other processes
- Built to specification
- Usable in-house

Background

I am an experienced actuary and insurance specialist. I am a Fellow of the Casualty Actuarial Society (FCAS) and Chartered Property Casualty Underwriter (CPCU). I specialize in pricing homeowners and auto insurance, property catastrophe research, predictive analytics, and the intersection of insurance with public policy. I have authored research reports for groups such as the Society of Actuaries, the Casualty Actuarial Society, and the American Property Casualty Insurance Association on wildfire risk mitigation, the effect of hurricanes on health outcomes, climate change, pending legislation, and catastrophe litigation. In 2022, I founded Cuanto Consulting. Prior to this, I worked as a pricing and research actuary at AAA Insurance and a Principal and Consulting Actuary at Milliman, Inc.

Portfolio

The examples below are a small sample of my public and nonpublic research reports, articles, and presentations.
For full references, see the link at the bottom.

Society of Actuaries Research Report on Hurricanes and Health:

Led a team with expertise in medicine, GIS, and data science to combine healthcare experience data with hurricane footprints to evaluate the potential effect of recent hurricanes on the prevalence of 16 different medical conditions:

www.soa.org/resources/research-reports/2022/health-hurricanes-impact/

Surplus Line of California Report on Adequate Market:

Using publicly available data, evaluated market conditions to assess the reasonableness of including earthquake insurance in the California non-admitted market:

www.wsia.org/docs/PDF/FINAL_Milliman_Report.pdf

Casualty Actuarial Society Online Course on Wildfire Insurance:

Created an online course for actuaries to learn about pricing, regulation, mitigation, and the history of wildfires in the insurance marketplace:
